Focused and creative **iOS developer,** passionate about creating apps using **Swift**. Caring for users and the big picture, not just the code. I love creating awesome iPhone & iPad Apps that really makes a difference. Happy to participate in your existing or potential mobile app. Open to explore **junior-level** iOS roles.

SKILLS & TOOLS

- Swift
- Git, GitHub
- OOP, POP
- MVC, MVP
- UIKit, SnapKit
- Storyboard, Xib
- Restful APIs, JSON
- Codable, Alamofire
- GCD
- Core Data, Realm, Firebase
- Google Maps, MapKit
- Core Location

EXPERIENCE

iOS Developer @ Natife   Jan 2022 – Present

Worked in an environment of experienced ios developers to gain skills in creating clean code.
- Created and published the game Imaginarium.
  The game is similar to Alias but with more functionality. Supports 3 languages, contains ads and purchases.
- Created my location app.
  Allows the user to view the nearest restaurants, determine the location and choose a place to eat.
- Created popular movies app.
  An application that allows you to choose the best movie for the evening. It is possible to sort, search and watch the movie trailer. All watched movies are saved locally and allow you to watch offline.
- Fixed bugs in other applications before publishing to the app store.

Freelance Developer @ CFOOD   June 2021 – Dec

Core developer on a team, responsible for the stable operation of all development processes.
- Worked closely with UI/UX designers to produce a pixel-perfect design
- Responsible for the integration of the 1C and IIKO CRM systems
- Supervised the creation of the online store
- Communicate directly with clients to crate precise acceptance criteria
- Provide clear manual for using all the necessary tools for client's employees
- Took the main role in planning and estimating costs for creating MVP iOS application

EDUCATION

B.Sc., Software Engineering, National University of Zaporizhia
iOS & Swift, App Developer, The Complete Development Bootcamp
Multithreading, GCD, Operation, Advanced Swift Multithreading Course

PROJECTS

Facebook Messenger Clone App
Full featured live chat app like Facebook Messenger. This includes designing and building a user interface, connecting a database, uploading images, and more

Object Model of the bus station ticket office
Full modelling of the auto show system. Creation of the possibility of ordering / returning tickets, viewing the arrival schedule for each station.

LANGUAGES - English (B2), Russian (C2), Ukrainian (C2)
